TECHNICAL SKILLS

Languages: Python, Java, TypeScript, JavaScript, C++, C, C#, Bash, SQL, PHP, HTML/CSS

Tools / Frameworks: Git, React.js, Vue.js, Node.js, Flask, Laravel, MongoDB, MySQL, Docker, AWS, Unity

EDUCATION

University of Waterloo

Waterloo, ON

Bachelor of Computer Science Co-op Program

September 2021 - May 2025

- **Specializations and Minors:** Artificial Intelligence (AI) Specialization, Combinatorics and Optimization Minor
- **Relevant courses:** Data Structures & Algorithms, Object-Oriented Programming, Sequential Programming, Functional Programming, Software Design & Architecture, Operating Systems, Numerical Computation, Compilers, Computer Networks, Combinatorial Optimization, Artificial Intelligence

EXPERIENCE

Fullstack Developer Intern | Knak, Ottawa

January 2024 – April 2024

- Current fullstack developer intern on the Editor Team for Winter 2024 (**Vue.js, PHP, AWS, Docker**)
- Streamlined marketing processes by **95%** for enterprise companies through developing Knak's editor platform, allowing clients to create customized email and landing pages in minutes and without any coding knowledge
- Participated in biweekly sprint planning sessions to implement new features requested by customers

Backend Developer Intern | Knak, Ottawa

September 2023 – December 2023

- Utilized **AWS Lambda** with **Docker** containers to parse user assets into dynamic HTML code for marketers
- Developed migrations to the **MySQL** database to update client and content data in Knak's editor platform
- Reorganized company preference flags in the codebase, cleaning up the backlog by **50%** within a few weeks

Game Developer Intern | ZeMind Game Studios, Toronto

May 2023 – August 2023

- Built a virtual reality (VR) application from scratch in **Unity/C#** for Durham Region Victim Services, providing three immersive experiences to help youth navigate exploitative situations
- Designed project's **backend architecture** through encapsulation and abstract class interfaces; developed scripts with the **Oculus SDK** to handle player events and user input tracking in virtual space

Software Developer Intern | Royal Bank of Canada, Toronto

May 2022 – August 2022

- Designed and developed a **Flask** application to test **60%** of RBC's site actions with **Python, Pytest** and **Selenium**; adopted by team of 10 developers, improving testing time efficiency by **80%** before deployment
- Communicated with team in redesigning a company wide **Vue.js** web application through agile processes

PROJECTS

🔗 Emulator for Game Boy | C, SDL

- Game Boy CPU core emulator, effectively handling user input and sprite rendering using **C** and the **SDL** library

🔗 Multiplayer Tetris | C++, XMinig Server

- Tetris game using **OOP** principles to implement the **MVC** architecture through graphical/text display observers

🔗 Landing Page Generator | JavaScript, React.js, Node.js, MongoDB, Cohere LLM API, OpenAI API

- Link platform that provides a codeless editor to create personalized domains for users in under **2 minutes**

🔗 Java Plugins | Java, Spigot API

- Minecraft **Java** plugins with the **Spigot API** that modify the game's mechanics with custom server commands
